

Coating Facilities

PT.KHI Pipe Industries is capable to provide a complete pipe solution that will give you advantage which include: Complete coating & protection application including, Anti-corrosion protection, protective and weight coating and internal coating;

PT.KHI Pipe Industries is capable to provide a complete pipe solution that will give you advantage which include:

- Complete coating & protection application including, Anti-corrosion protection, protective and weight coating and internal coating.

- A wide diameter range coating application from 4" up to 60";
- Integrated pipe mill give you total pipe solution from material supply, pipe mill, coating application & transportation.
- Long history of experiences that dates back to the 1973.
- High quality pipe with production specification standard for oil & gas application and other application proved by API 5L certification and ISO 9001: 2000.

For external-coating process KHI had been equipped with shot blasting machine conform to ISO 8501-1 and SSPC standards to assure the quality of its products. The qualities of pipe coating are inspected using high voltage Holiday detected equipment. The above external protection and coating meet British Standard, AWWA, or other standards as specified.

- External Liquid Epoxy Coating
- FBE Coating
- Three Layer Polyethylene System (3LPE)
- Three Layer Polypropylene Tape System (3LPP)
- Concrete Weight Coating Internal Coating
- Internal Liquid Epoxy Coating

- Cement Mortar Lining
